

## ClueDoku

Solve the clues and fill the letters into the grid as indicated by the arrows, starting in the circle (⊙).

An example has been done for you.

The puzzle then works like a Sudoku - only nine different letters have been used.

Each row, column and 3x3 box must contain all nine letters once only, so use the process of elimination and logic to complete the Cluedoku.

*Hint: The nine different letters can all be found in the answer to the first clue.*
